DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed 11/14/03 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but only the US references listed have been considered.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claims 3-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 3-8 do not further limit the system claim 1. Claims 3-8 merely set forth the intended use of the system of claim 1 and do not further limit claim 1. Also, claim 1 is a system claim and claims 3-8 are method claims. Different statutory classes of invention cannot depend from one another in the manner set forth here. It is confusing if applicant is claiming a system or method. Correction is required.

Claim Objections

Claims 1-11 are objected to because of the following informalities: The following terms do not contain proper antecedent basis: Claim 1, line 5, "the exhaust"; claim 1, line 8, "the injection well bores"; claim 5, line 2; "the viscosity"; claim 8, line 2, "the

horizontal producing well bore”; and claim 8, line 3, “the base of the hydrocarbon reservoir”. Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 and 9-11 are rejected under 35 U.S.C. 102(b) as being anticipated by Schlinger 4,007,786.

Schlinger discloses a system for recovering heavy oil from a subsurface e reservoir. An above ground gas powered turbine generator 32 is provided. The exhaust 38 from the turbine works in a heat exchange relationship with water 45 to produce super heated steam that is to be injected into the reservoir at 48. The steam injected induces steam assisted gravity drainage. As to claim 2, the electric energy created by the turbine is sold to consumers at 37. As to claim 3, the oil as a specific gravity of 13 (see column 8, lines 30-35). As to claim 9, produced gas is used to drive the turbine. As to claim 10, water 45 is from the formation. As to claim 11, the power generated is distributed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3672

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schlinger.

Claims 4-8 set forth merely intended uses of the system of claim 1. The system of claim 1 and of Schlinger could be used in any reservoir having any properties. It would have been considered obvious to use the system of Schlinger in any of the claimed reservoir conditions.
